RISHI THAKUR

BUSINESS ANALYST | SQL & BI

Bengaluru, India • +91 8109830219 • rishi_th219@proton.me • rishi-th219.github.io/portfolio
LinkedIn • GitHub

PROFESSIONAL SUMMARY

Business Analyst and SQL Developer experienced in business problem decomposition, relational database querying, and executive leadership alignment. Partnered directly with Department Leadership to deconstruct operational bottlenecks into 3 structured initiatives across 33 districts. Experienced authoring SQL workflows, designing 3-tier risk models, and deploying Power BI dashboards. Background in M.Tech CSE and GATE CS.

SKILLS

- **Business & Strategy Analytics:** Business Problem Decomposition, Defaulter Risk Modeling, Process Mining (Celonis), Root Cause Analysis, KPI Definition, Operational Strategy
- **Databases & Advanced SQL:** Advanced SQL (Multi-Table Joins, CTEs, Window Functions, Subqueries), MySQL, MariaDB, OracleDB, Query Optimization, Relational Database Design
- **BI Systems & Data Modeling:** Microsoft Power BI (DAX, Power Query), Advanced Excel (Pivot Tables, What-If Analysis), Star Schema, Dimensional Modeling, Python (Pandas)
- **Communication & Spoken Skills:** Executive Stakeholder Management, Requirements Elicitation, Client Presentations, Cross-Functional Alignment, Workshop Facilitation, Technical Writing

WORK EXPERIENCE

Chhattisgarh Infotech Promotion Society (CHiPS) | Raipur, India | 06/2025 – 03/2026
Business Analyst & SQL Developer Intern • Dept. of Health & Family Welfare, Govt. Of Chhattisgarh

- Partnered directly with the Department Secretary to deconstruct complex statewide attendance and compliance bottlenecks across **33 districts** into **3 structured initiatives**.
- Uncovered compliance gaps by conceptualizing a **3-tier defaulter risk model** for bonded personnel, mapping State Treasury payroll data to track financial leakage.
- Authored performant **SQL data pipelines** (multi-way joins, CTEs, window functions) bridging biometric IDs with Treasury records, resolving discrepancies with **100% data fidelity**.
- Coordinated with National Informatics Centre (NIC) engineers to reconcile disparate schemas across MariaDB, State Treasury, and National Next-Gen e-Hospital systems.
- Architected an executive 6-page **Power BI dashboard** with **4-tier drill-down hierarchies** (District → Facility → Designation → Individual) tracking core KPIs.

KEY PROJECTS

5G Network Telemetry & Failure Prevention • *Predictive Risk Analytics*
Technologies: Python, PyTorch, Scikit-learn, Random Forest, SMOTE, Tomek Links

- Built a predictive model forecasting signal degradation from multivariate **spatio-temporal** telemetry, addressing **98%/2% class imbalance** via **SMOTE + Tomek Links**.
- Designed a two-stage classification pipeline with custom loss objectives, attaining a **97.64% F1-score** to proactively prevent service failures and process bottlenecks.

Anomalous Content & Text Classification System • *Applied Analytics*
Technologies: Python, BERT, XGBoost, Bi-LSTM, Transformers

- Architected dual text classification workflows evaluating **BERT + XGBoost** versus hybrid Bi-LSTM/Transformer models across high-volume document sets for verification.
- Tuned decision boundaries to achieve **99% Precision** and **98% Recall**, delivering rigorous quantitative benchmarks for automated operational audits.

EDUCATION

M.Tech in Computer Science & Engineering | IIIT Naya Raipur (CGPA: 7.90) | 08/2024 – 07/2026
B.Tech in Computer Science | Amity University Chhattisgarh (CGPA: 7.71) | 08/2019 – 06/2023

CERTIFICATIONS & KEY QUALIFICATIONS

- **SQL & Database Design** (Udemy)
- **Celonis Process Mining Foundations** (Credly)
- **Microsoft Power BI** (Udemy)
- **Python for Data Science & AI** (Coursera)
- **Qualified GATE Computer Science (CS)**, 2024
- **IELTS Academic:** 7.5 Band Score
