PROFESSIONAL SUMMARY

SQL Developer and Database Specialist experienced in relational database design, query optimization, and enterprise data reconciliation across public infrastructure. Demonstrated history engineering SQL pipelines (multi-table joins, CTEs, window functions, execution plan tuning) across MariaDB, OracleDB, and MySQL for 33 districts. Proficient in Kimball Star Schema modeling, query latency reduction, and ETL workflows. Background in M.Tech CSE and GATE CS.

SKILLS

- **Database Engines & Systems:** MySQL, MariaDB, OracleDB, PostgreSQL, SQL Server (T-SQL), Database Architecture, Relational Schema Design, Normalization (1NF–3NF, BCNF), Indexing (B-Tree)
- **Advanced SQL & Optimization:** Multi-Table Joins, CTEs, Window Functions (ROW_NUMBER, DENSE_RANK, LEAD/LAG), Subqueries, Stored Procedures, Views, Execution Plan Tuning
- **Data Modeling & ETL Pipelines:** Star Schema Modeling, Schema Reconciliation, Multi-Source ETL Pipelines, Data Integrity Enforcement, Python (SQLAlchemy), Power BI
- **Communication & Spoken Skills:** Technical Documentation, Cross-Functional Collaboration, Database Requirements Gathering, Developer Communication, Sprint Demos

WORK EXPERIENCE

Chhattisgarh Infotech Promotion Society (CHiPS) | Raipur, India | 06/2025 – 03/2026
SQL Developer & Data Analyst Intern • Dept. of Health & Family Welfare, Govt. Of Chhattisgarh

- Engineered **SQL scripts** (multi-table joins, CTEs, window functions) across **33 districts** to clean and structure high-volume raw biometric attendance logs in MariaDB.
- Designed and implemented an automated **SQL identity-resolution pipeline** bridging AEBAS biometric IDs with State Treasury payroll records, maintaining **100% data integrity**.
- Developed an analytical data mart utilizing **Kimball Star Schema principles**, consolidating attendance, doctor service bond registries, and OPD logs from National Next-Gen e-Hospital systems.
- Optimized query execution plans by introducing targeted B-Tree indexes and refactoring subqueries into indexed temporary tables, reducing query latency across large tables.
- Standardized naming conventions, eliminated duplicate job designation records, and enforced referential integrity rules across heterogeneous production database environments.

KEY PROJECTS

High-Volume Telemetry Pipeline & Degradation Forecasting • *Telemetry Data Pipeline & Classification*
Technologies: Python, PyTorch, SQL, Scikit-learn, Random Forest, SMOTE

- Constructed data pipelines to clean and preprocess multivariate **spatio-temporal** telemetry, resolving **98%/2% class imbalance** via **SMOTE + Tomek Links**.
- Evaluated 50 trajectory simulations against physical thresholds, achieving a **97.64% F1-score** with an optimized Random Forest policy engine.

AI vs. Human Text Classification Pipeline • *Data Pipeline & Applied NLP*
Technologies: Python, SQL, BERT, XGBoost, Transformers, Scikit-learn

- Constructed end-to-end data pipelines for text classification, preprocessing large-scale corpora and generating 768-dim **BERT contextual embeddings** for **XGBoost** modeling.
- Benchmarked against a deep Bi-LSTM/Transformer architecture, achieving **99% Precision** and **98% Recall** with optimized inference latency.

EDUCATION

M.Tech in Computer Science & Engineering | IIIT Naya Raipur (CGPA: 7.90) | 08/2024 – 07/2026
B.Tech in Computer Science | Amity University Chhattisgarh (CGPA: 7.71) | 08/2019 – 06/2023

CERTIFICATIONS & KEY QUALIFICATIONS

- **SQL & Database Design** (Udemy)
- **Celonis Process Mining Foundations** (Credly)
- **Microsoft Power BI** (Udemy)
- **Python for Data Science & AI** (Coursera)
- **Qualified GATE Computer Science (CS)**, 2024
- **IELTS Academic:** 7.5 Band Score
