RISHI THAKUR

SQL Developer | Database Engineering & Analytics

Bengaluru, India • +91 8109830219 • rishi_th219@proton.me • linkedin.com/in/rishi-thakur-b665a4298 • github.com/rishi-th219

PROFESSIONAL SUMMARY

High-performing SQL Developer and Database Specialist experienced in relational database design, complex analytical querying, and enterprise data reconciliation across state-scale architectures. Proven background engineering high-throughput SQL pipelines (multi-table joins, recursive CTEs, window functions, execution plan optimization) across MariaDB, OracleDB, and MySQL for 33 districts and 1,000+ facilities at CHiPS. Skilled in dimensional Star Schema architecture, multi-source ETL identity resolution, and Advanced Excel data auditing to deliver verified, high-integrity analytical data layers.

TECHNICAL SKILLS

- **Databases & Querying:** Advanced SQL (T-SQL, MySQL, MariaDB, OracleDB, PostgreSQL) — Complex Multi-Table Joins, Recursive CTEs, Window Functions (ROW_NUMBER, RANK, DENSE_RANK, LEAD/LAG), Subqueries, Aggregations, Execution Plan Tuning, Indexing Strategies, Stored Procedures & Triggers
- **Data Modeling & ETL:** Dimensional Modeling (Kimball Star Schema, Fact & Dimension Tables, SCD Types), Multi-Source ETL Pipelines, Identity Resolution Algorithms, Heterogeneous Schema Reconciliation, Data Integrity Controls, Data Cleansing
- **Advanced Excel & BI:** Advanced Excel (XLOOKUP, INDEX/MATCH, Dynamic Arrays, Nested Logic, Pivot Tables, Power Pivot Data Modeling, Power Query M-code, Scenario Modeling, VBA & Macros), Microsoft Power BI (DAX Measures, Time Intelligence), Oracle Analytics Cloud (OAC)
- **Programming & Quality:** Python (Pandas, NumPy, Scikit-learn), Automated Data Validation Pipelines, UAT Testing Protocols, Relational Schema DDL/DML Design, Git, Technical Documentation & Audit Trails

PROFESSIONAL EXPERIENCE

SQL Developer & Data Analyst Intern | Chhattisgarh Infotech Promotion Society (CHiPS) **06/2025 – 03/2026**

Dept. of Health & Family Welfare, Govt. of Chhattisgarh *Raipur, India*

- **Automated SQL/ETL Identity Resolution:** Engineered an automated SQL/ETL pipeline utilizing complex multi-table CTEs, string normalization, and window functions to bridge disparate AEBAS biometric attendance IDs with State Treasury payroll records, resolving cross-departmental tracking gaps and categorizing doctors into 3 compliance tiers.
- **Heterogeneous Schema Reconciliation:** Collaborated directly with National Informatics Centre (NIC) database engineers to reconcile disparate relational schemas across MariaDB attendance engines, State Treasury databases, and National NextGen e-Hospital OPD systems into a unified dimensional data mart.
- **Dimensional Modeling & Performance Tuning:** Designed and maintained performant Kimball Star Schema fact and dimension tables; optimized long-running analytical queries through indexed staging views and CTE refactoring, reducing data extraction latencies for executive BI reporting.
- **Supply Chain & Inventory SQL Workflows:** Authored advanced Oracle SQL queries aggregating multi-year batch consumption, lead times, safety stocks, and reorder triggers on essential drug catalogs in OracleDB; performed multi-dimensional ABC, VED, and SDE matrix classification deployed across 5 sub-departments.
- **Advanced Excel Data Auditing & Validation:** Built automated Excel auditing workbooks leveraging Power Query, dynamic array formulas, and Pivot Tables to cross-verify SQL database extracts against field submissions, ensuring 100% data fidelity for executive review by the Department Secretary.

KEY PROJECTS

Proactive Risk Prediction & Decision Engine | *Python, PyTorch, Scikit-learn* **M.Tech Thesis — Predictive ML**

- Engineered an automated proactive decision framework replacing reactive delay-based protocols using multivariate temporal telemetry; handled 98:2 class imbalance via **SMOTE + Tomek Links** and attained a **97.64% F1-score** on failure classification.

Anomalous Content & Text Classification System | *Python, BERT, XGBoost, Transformers* **Applied Machine Learning & NLP**

- Built and benchmarked dual classification pipelines (BERT + XGBoost and Deep Hybrid Neural Networks) to isolate synthetic and anomalous patterns across large corpora, optimizing decision thresholds to achieve **99% Precision** and **98% Recall**.

EDUCATION

M.Tech in Computer Science & Engineering | IIIT Naya Raipur (**CGPA: 7.90**) **08/2024 – 07/2026**

B.Tech in Computer Science & Engineering | Amity University Chhattisgarh (**CGPA: 7.71**) **08/2019 – 06/2023**

CERTIFICATIONS & KEY QUALIFICATIONS

- **SQL for Beginners & Database Design (Udemy)** | **Qualified GATE (CS), 2024**
- **Microsoft Power BI Desktop for Business Intelligence (Udemy)** | **IELTS Academic: 7.5 Band Score**
- **Python for Data Science, AI & Development (Coursera)** | **Machine Learning (NPTEL)**
